WIRE RODS

For use in construction, as raw material for wire drawing. It is a hot rolled product, with the cooling process-controlled system called Stelmor System, gives wire rod micro-structural characteristics and specific and uniform mechanical properties, which allows a better behavior during the subsequent industrialization processes.

CHARACTERISTICS

- Compliance with standards NMX-B-365 and ASTM-A-510.
- It can be manufactured with special ranges in the carbon content, according to the specific needs of the client.

USES AND APPLICATIONS

- Raw material in the wire drawing industry.
- Construction Industry.
- Meshes, armor, metal fabrics, screens, nails, barbed wire and other derivatives.

TECNICAL INFORMATION

PRESENTATION

COIL WEIGHT	EXTERNAL DIAMETER	INTERNAL DIAMETER
kg	m	m
1,500 - 1,600	0.8	1.25

NOMINAL DIAMETER	
mm	in
5.5	0.218
6.3	0.25
7	0.276
8	0.315
9.5	0.374
10	0.394
11	0.434
12	0.473
